Pirate Code 1.6.0 Released! : The Ocean Awaits!. Sneak Peek for Update 1.5.2! : Update 1.5.2 is almost here!. Happy Birthday Pirate Code! : Pirate Code was released one year ago! Since then, based on feedback from you, the players, major portions of the game have been improved. I didn't want to pass up this opportunity to give an update on the next release. It would have been nice to release the update today, but the real world doesn't always work out perfectly like that and I didn't want to give you a half-tested update. What I can do is tell you what's coming.. Pirate Code 1.6.2 Released! : It's been over a month since I announce that another big update was coming to Pirate Code. It has arrived. Pirate Code 1.6.2 is now available and it is by far, the best Pirate Code yet! What's new this time? Ship upgrades.. Pirate Code 1.5.4 - Bugs and Speed! : Pirate Code 1.5.4 is now live! Most of my time on this update was spent reworking much of the underlying code for the world map. My main focus was improving performance and I feel like I succeeded. There's not much more I can do to make it faster. If you still experience problems, please feel free to reach out to me. I've also found that running the game in window mode and using a smaller window helps with performance. Hopefully that won't be needed by most of you. Although the world map should feel about the same, much of the code changed under the surface. Naturally, a bug or two may have been introduced. Please let me know if you find one. This update also fixes a few bugs discovered by the community. I'll list them out below.. Pirate Code 1.6.0 Released! : The Ocean Awaits!. Pirate Code 1.5.2 - The UI Update! : Pirate Code has new Combat User Interface!
